Delhi

SUMMARY

I am a passionate MERN Stack and Blockchain Developer with hands-on experience in building dynamic and responsive web applications. Proficient in MongoDB, Express.js, React.js, and Node.js, I specialize in creating RESTful APIs, integrating front-end and back-end seamlessly, and implementing secure authentication mechanisms. With a strong foundation in JavaScript and problem-solving skills, I am eager to contribute to innovative projects and grow as a full-stack developer

PROJECTS

Hotel Management

Only for backend design with Node.js Express.js with mongoose and JWT TOKEN and session are managed in the project and multiple end points like waiter chef and manager fully user authentication

Ecommerce

This project is a responsive ecommerce platform developed using React.js for a dynamic and interactive front-end and Tailwind CSS for sleek modern and fully customizable styling. The platform offers essential features of an online store including and handle Admin panel Features: Home Page Product Listing Page Product Detail Page User login and signup pages. Protected routes for cart and checkout. Responsive Design: Fully responsive layout optimized for desktop, tablet, and mobile devices.
